

Climate  
Change

## Key Questions about Climate Data

**Aligning infrastructure standards with information about the future climate:  
choices to be made for climate datasets to become a reference in standards**

- Where to extract relevant information ?
- Climate Scenarios
- Climate models: Regional versus Global scale
- An **ensemble** of opportunities
- How to characterize and what is the «uncertainty»?
- Definition of extreme events and co-defined relevant indicators
- Technical aspects: Bias-adjustment, past data, reference periods
- Other technical aspects: file format,..
- Guidance & training
