WORKSHOP // MARCH 17TH AND 18TH 2021

Climate resilience and design codes - factoring in climate projections

Aligning infrastructure standards with information about the future climate

The climate is changing rapidly, and effects are already being experienced in the built environment. Are you interested in how future climate information will be dealt with in standards?

This workshop is part of the EC Mandate 526 on CEN/CENELEC which deals with the incorporation of future climate information in standards, and is a step towards producing an outline for a CEN Technical Report in this area.
